

The Six Days of Creation (Grades K-2)

The Bible teaches that God created everything in just six days (Exodus 20:11). Join us as we take a closer look at each of these days and discover God's favorite creatures. The activities below will help you remember what God created on each of the six days of Creation Week. Let's get started!

Day 1: Earth, space, time and light (Genesis 1:3-5)

When God first created the Earth, it was a lot different than it is today. The Bible says that the Earth was basically a watery ball. To find out what the first day may have been like, complete the activity below.

Activity: Light experiment

1. Team up with a parent or a friend.
2. Find a playball (preferably blue) and a flashlight.
3. Go into a room with no windows.
4. Turn on the flashlight and shine it onto the ball.
5. Turn off the room light.
6. Rotate the ball and think about Day 1 of Creation Week

Day 2: The atmosphere (Genesis 1:6-8)

The next time you go outside, look up into the sky and thank God for creating the atmosphere (the air surrounding the Earth). The atmosphere enables us to breathe, helps keep us warm and protects us from the sun's harmful rays. Life would not be possible without the atmosphere!

Day 3: Dry land and plants (Genesis 1:9-13)

On Day 3 of Creation Week, God caused dry land to appear and created plants. Many plants are beautiful and provide us with food, shade, and oxygen to breathe. Some can also be used to create medicine.

Activity: Scavenger hunt

1. Team up with a parent
2. Collect as many of the following items that you can find:
 - flower
 - some blades of grass
 - 2 different rocks
 - seeds
 - A vegetable
 - 4 different types of tree leaves
 - leaf from a bush
 - twig or small branch
 - piece of fruit
3. Tape or glue your items onto to a posterboard and label them.

For discussion: why do you think God created so many different types of plants?

Day 4: The sun, moon and stars (Genesis 1:16)

On Day 4 God created the sun, moon and stars. The sun is extremely important for many reasons. It helps keep us warm and healthy. It also provides energy and helps the plants grow. God knew that we would need the sun!

The moon is very beautiful to look at. It also provides light at night and creates the ocean tides. This helps keep the creatures that live in the ocean healthy and happy.

God created more stars that we could ever count. What is amazing is that God knows each of them by name! (Psalm 147:1-5)

Activity: color the picture below

Day 5: Sea and flying creatures (Genesis 1:20)

On Day 5 God made creatures that live in water. This includes fish, dolphins, whales, eels, sharks, crabs, lobsters, sea turtles and thousands of other types of creatures!

God also made creatures that fly on day five. This includes birds, bees, dragonflies, bats, flying insects, pterodactyls (winged reptiles) and many others!

Day 6: Land creatures and people (Genesis 1:24-27)

On Day 6 God made creatures that move along the ground. This includes dogs, cats, bears, mice, deer, elephants, hippos, crawling insects, dinosaurs and thousands of other creatures! God also made His favorite creatures on Day 6! Do you know what they are? Hint: go look into a mirror. We are God's favorite creatures because we were made in His image (Genesis 1:27). God loves you!

Activity: draw lines to connect the items pictures below to the day they were created
